Optimize TechOps Through AI-Driven Insights

Developed since 2010 by EPAM to manage its own complex, IT services business, the award-winning TelescopeAI™ platform is now broadly available to customers. Leveraging our dedicated team of product development professionals and EPAM's 25+ years of software engineering expertise, TelescopeAI™ uses artificial intelligence to give you a 360-degree view of your operations, offering the foresight necessary to navigate business challenges, lower costs, and increase efficiency and productivity. From employee utilization to engagement and project monitoring to execution, TelescopeAI™ allows you to make more informed decisions, faster.

GET DEEPER INSIGHTS FROM AGGREGATED DATA ON PROJECTS & PEOPLE FOR ENHANCED PRODUCTIVITY

Using AI analytics, TelescopeAI™ pulls actionable insights from various data sources, giving you the ability to assess cross-domain projects, as well as better understand and articulate their business value. The platform fits seamlessly into your way of working by integrating market-leading tools and technologies, such as JIRA, GitHub, Jenkins and more. Here are just some of the key benefits that TelescopeAI™ offers:

- Collaborate across all project teams to increase productivity and drive effective program delivery
- Get a 360-degree view of the entire project lifecycle, including IT KPIs that are critical to the entire organization and project ROI
- Review progress metrics for code quality, accrued technical debt, team sprint workloads and velocities
- Manage employee productivity and output across IT teams that span multiple geographies
- Discover any gaps in employee technical skills and provide the necessary training or additional resources to fill those gaps
- Easily assess project status via the R/Y/G indicator and escalate any failure risks for immediate and proactive resolution
- Automate IT project approval and management workflows to streamline delivery
- Monitor and assess IT employee utilization to ensure workloads are balanced across the team
- See how your product and project teams are performing against others in the organization
- Leverage TelescopeAI's learning and communication platforms for corporate trainings and employee development programs

Meet Everyone's Needs with a Personalized Interface

Offering more than 30 applications, TelescopeAI™ uncovers an adaptable and personalized way to interact with the KPIs and information most relevant to your business. If you already have applications in place, the platform allows you to embrace and extend rather than rip and replace the systems you've already implemented. Here are the modules that come standard with TelescopeAI™:

1. HEALTH MONITOR

Review projects in development, identify projects that are challenged and need additional resources, or are operating according to plan.

To learn more about HEALTH MONITOR, visit www.telescopeai.com/explore-telescopeai/health-monitor

2. PERFORMANCE MONITOR

Drill down to the smallest details regarding current projects, getting the highest level of delivery transparency necessary to drive project success.

To learn more about PERFORMANCE MONITOR, visit www.telescopeai.com/explore-telescopeai/performance-monitor

3. TELESCOPE

Find the right people with the right skills at the right time for the successful delivery of your technology projects.

To learn more about TELESCOPE, visit www.telescopeai.com/explore-telescopeai/telescope

4. DASHBOARD

Provides visibility into your critical KPI's through over 40 customizable widgets.

To learn more about DASHBOARD, visit www.telescopeai.com/explore-telescopeai/dashboard
